

# MyRegionOne.org

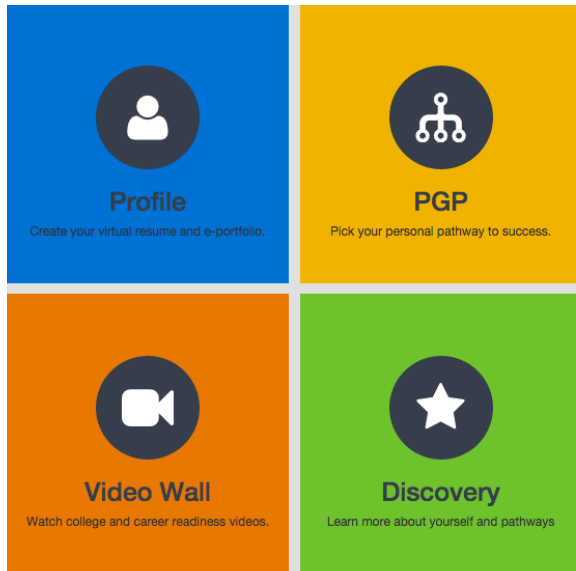

Guiding Students Toward College and Career Readiness

## A **POWERFUL** tool for Student Success

**Just imagine...**an online platform that will allow students to create a digital portfolio, learn about career pathways, map out a high school to post-secondary academic plan, have the ability to share that information with colleges and employers for the rest of their lives, and will engage parents in the college readiness process.

It's possible with **MyRegionOne.org!**

With MyRegionOne.org students can create and update their digital portfolio, which is aligned to ApplyTexas.

Students can develop a 6-year plan, building a connection between high school and post-secondary institutions, based on their pathway.

MyRegionOne.org grows with the student - as their interests change, students can update their Career Interest Inventory to open up new doors of possibilities.

For more information about how you and your student can begin the path to college and career readiness through MyRegionOne, contact your child's counselor.
